SUMMARY

Computer Science student at HILCoE School of Computer Science and Technology with practical experience developing full-stack and desktop applications using JavaScript, React, Node.js, C#, Java, and SQL. Passionate about building software that solves real-world problems while continuously expanding my skills in web development, backend systems, databases, and AI-powered applications. Strong foundation in object-oriented programming, problem solving, and collaborative software development.

EDUCATION

HILCoE School of Computer Science and Technology

Bachelor of Science in Computer Science

Expected Graduation: 2027

PROJECTS

SentinelOS – Personal Intelligence & Analytics System | Tech Stack: React, Node.js, Express.js, MongoDB

- Developed a full-stack application for tracking personal activity and organizing behavioral data.
- Built backend services to store and retrieve user-generated analytics using MongoDB.
- Designed an interactive interface for viewing productivity insights and historical activity patterns.

Freelance Shield – Client Risk & Contract Toolkit | Tech Stack: JavaScript, React, Node.js

- Developed a web application to help freelancers organize client information and manage project workflows.
- Implemented a client evaluation system using predefined scoring rules.
- Designed features for contract organization, invoice management, and client risk tracking.

Smart Student Assistant – Academic Management Platform | Tech Stack: JavaScript, HTML, CSS

- Built a student productivity application for organizing schedules, assignments, and academic progress.
- Designed an intuitive interface for managing study timelines and course planning.
- Implemented progress tracking features to help users monitor academic goals.

Modern Expense Tracker | Tech Stack: React, Tailwind CSS, Framer Motion

- Developed a responsive personal finance application for tracking income, expenses, and budgets.
- Built reusable React components with dynamic state management.
- Designed a modern user interface with responsive layouts and smooth animations.

Retail Shop Management System | Tech Stack: Java, SQL

- Developed a desktop application for managing products, inventory, and customer records.
- Applied object-oriented programming concepts alongside database integration for efficient record management.

TECHNICAL SKILLS

JavaScript (ES6+)

Java

C#

C++

HTML5

CSS3

SQL

React
Node.js
Express.js
Tailwind CSS
Framer Motion
WinForms
MongoDB
MySQL
PostgreSQL
Git
GitHub
VS Code
Visual Studio
XAMPP
Cisco Packet Tracer
npm

RELEVANT COURSEWORK

Data Structures & Algorithms Database Systems System Analysis & Design Artificial Intelligence Computer Graphics
Numerical Methods Logic Design

LANGUAGES

Amharic — Native English — Professional Working Proficiency
